

WATER SUPPLY INFORMATION

1. Brief Description:

At present the Bijapur City Municipal Council is having a population of 2.5 Lakhs. Water is being supplied to the city from three sources. There are two main sources of water supply i.e.

(i) Butnal Impounding Reservoir pumping water from T.B. HLC which is located at 6 KM from city

(ii) Kolar Impounding Reservoir pumping water from T.B. LLC which is located at 15 KM from city.

The bulk water supply is being maintained by KUWS and D Board and distribution to consumer point is being maintained by Bijapur City Municipal Council. From these sources 12 MGD of water is being supplied during August to January and 9 MGD of water is being supplied during T.B. Canal closure period i.e. February to July.

The distribution of water to the city has been divided into three main zones.

(1) Cowl Bazaar Zone

(2) Mother Tank Zone

(3) Moka Zone

And 28 section zones. [For details click here.](#)
